5: Event Management System - Zoho Creator Reports Suite

Aim:

To design and build a complete suite of Reports in Zoho Creator for the **Event Management System** application, demonstrating the correct usage of all nine Report Types available in Zoho Creator.

Reports Used Overview

Report Type	Report Name
List View	`Registration_List_Report`
Spreadsheet View	`Registrations_Spreadsheet_Editor`
Kanban View	`Registration_Status_Kanban`
Calendar View	`Event_Schedule_Calendar`
Map View	`Attendee_Geographic_Map`
Timeline View	`Registration_Inflow_Timeline`
Pivot Table	`Event_By_FoodPreference_Pivot`
Chart View	`Ticket_Sales_Distribution_Chart`
Summary View	`Event_Portfolio_Summary`

Detailed Report Descriptions

1. Registration_List_Report (List View)

- Purpose: Default landing report for the Event Organizing Cell, displaying all attendee registrations in a clean, searchable tabular format.
- Features: Includes a global search bar, sorting options, and column-level filters for attendee names, linked event titles, email addresses, contact numbers, organization names, and registration types.

2. Registrations_Spreadsheet_Editor (Spreadsheet View)

- Purpose: Utilized daily by desk coordinators to review, check, and update application parameters quickly in a grid layout.
- Features: Allows inline editing for specific verification, accommodation requirements, and payment confirmation fields while keeping baseline identity details read-only for data integrity.

3. Registration_Status_Kanban (Kanban View)

- Purpose: Provides a visual pipeline for tracking how ticket registrations progress through various processing stages (e.g., Pending, Confirmed, Waitlisted, and Cancelled).
- Features: Cards can be dragged across columns to automatically update the underlying status field in real time.

4. Event_Schedule_Calendar (Calendar View)

- Purpose: Used by operational management and venue planners to monitor and manage scheduled event dates, speaker sessions, and venue slots.
- Features: Monthly, weekly, and daily grid views allowing quick identification of upcoming schedules, derived directly from the master event date configurations.

5. Attendee_Geographic_Map (Map View)

- Purpose: Deployed by the transport and logistics team to visualize the geographical distribution of registered delegates across regions like Chennai and surrounding areas.
- Features: Geocode-enabled pin placement to identify high-density

attendee zones, helping coordinate mass transit pickups and hotel allocations.

6. Registration_Inflow_Timeline (Timeline View)

- Purpose: Enables marketing and administrative management to track registration booking velocity and system submissions across specific hours and days of the week.
- Features: Chronological breakdown highlighting peak periods of ticket purchases, measuring early-bird promotion impacts.

7. Event_By_FoodPreference_Pivot (Pivot Table)

- Purpose: Summarizes relationships between specific events, subform guest details, and aggregate selections to help catering vendors plan dietary portions.
- Features: Evaluates structural fields (such as Veg, Non-Veg, and Vegan) against individual events, providing matrix totals and grand counts for internal review.

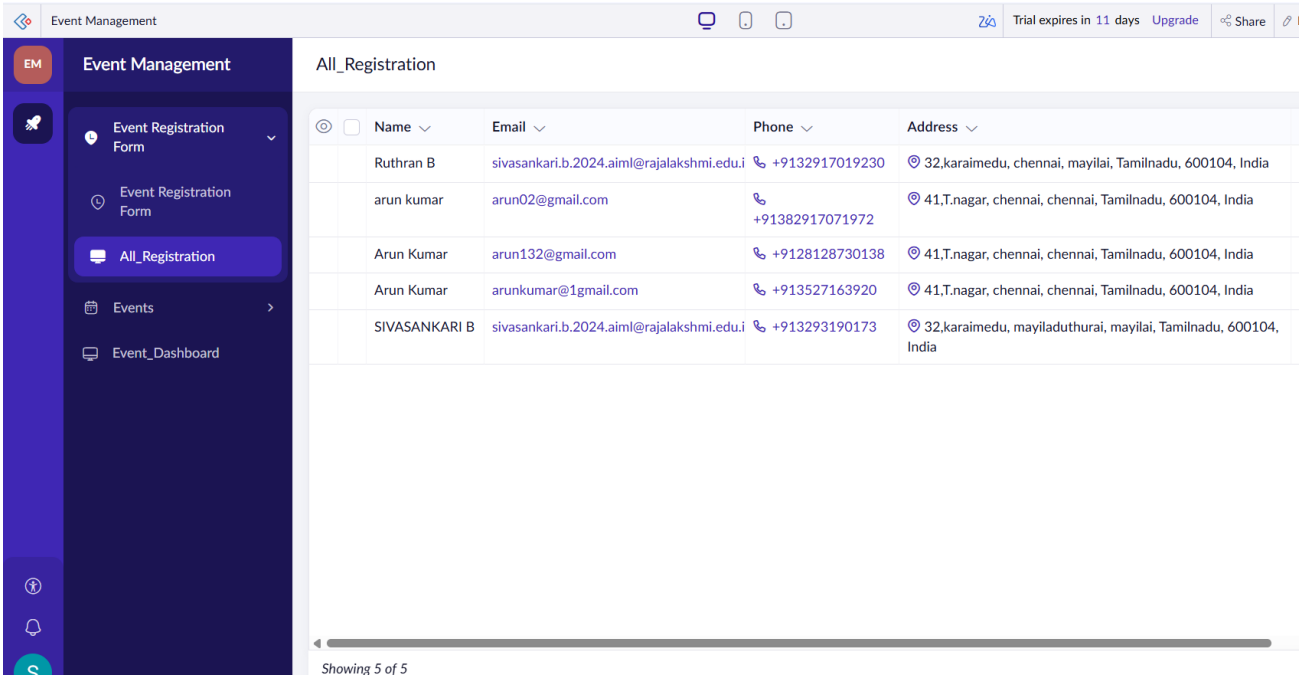

8. Ticket_Sales_Distribution_Chart (Chart View)

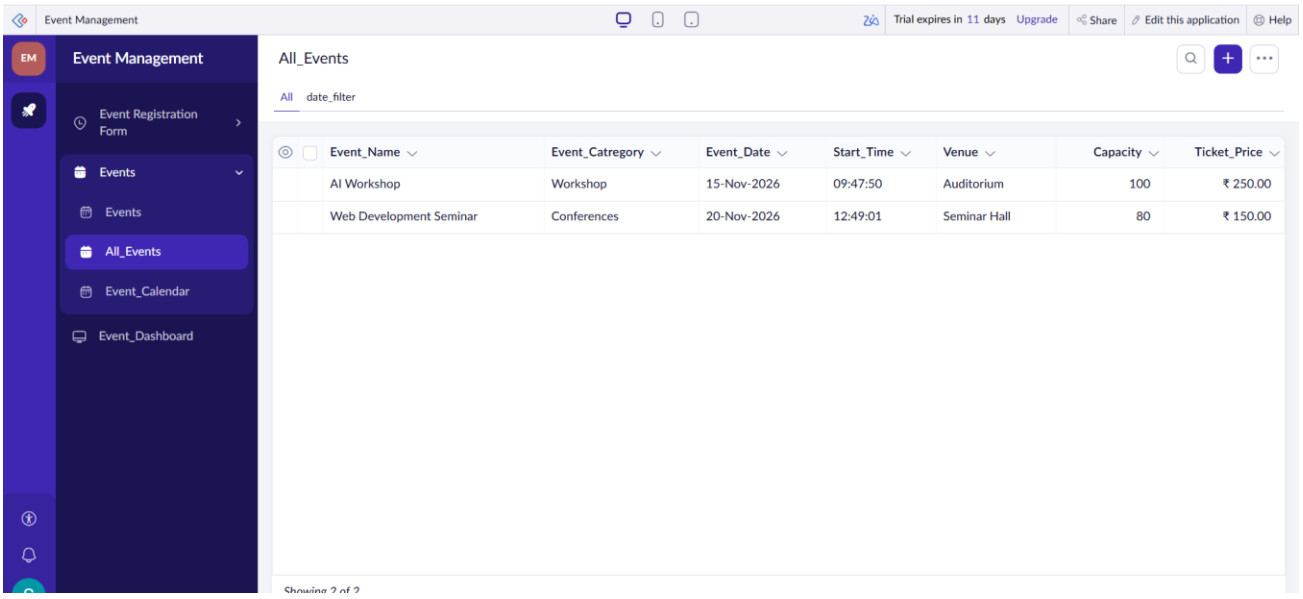

- Purpose: Visually compares ticket revenues and demographic categories across multiple events using interactive graphical nodes and filters.
- Features: Dynamic sorting and multi-legend filters for tracking payment classes and customer demographics**.**

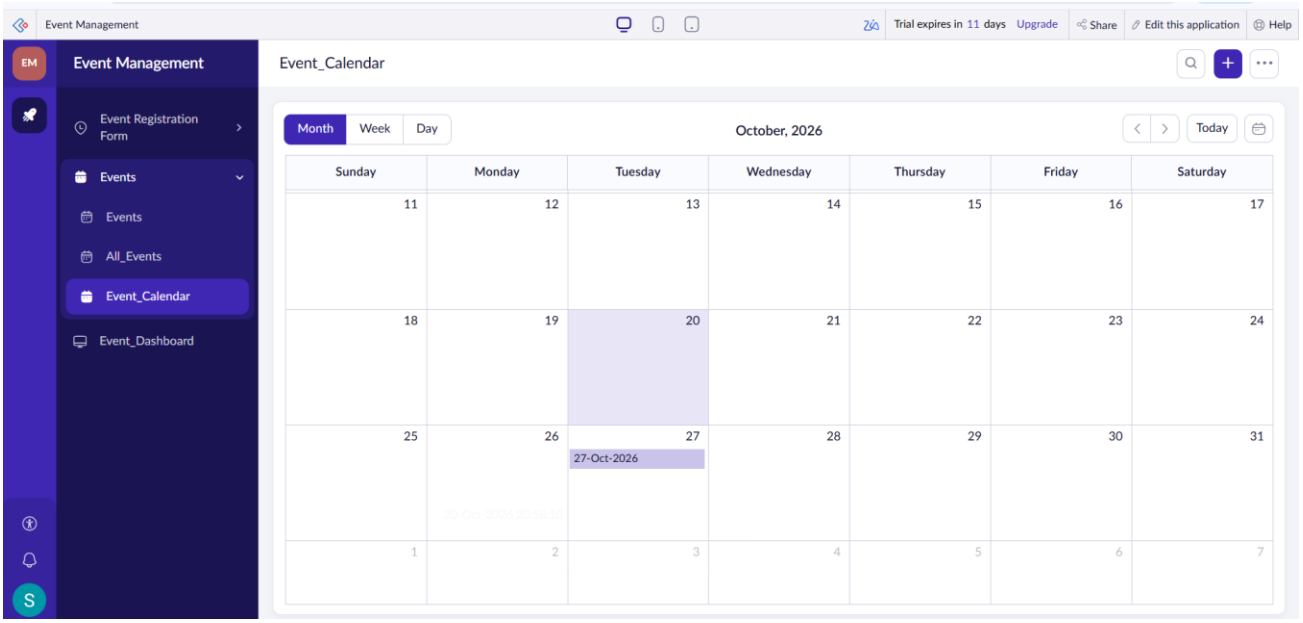

9. Event_Portfolio_Summary (Summary View)

- Purpose: Aggregates core financial metrics and participant volume counts to support executive committee reviews and budget limit planning.
- Features: Displays calculated totals, total discounts granted, and category groupings for quick executive summaries**.**
