6. Event management Application - Automation Suite & Workflow Options

Aim

To build and document the automation layer for the **Event management Application** process using Zoho Creator workflow options, covering form workflows, schedules, approvals, payments, blueprints, batch workflows, report workflows, and functions.

1. Objective

This experiment demonstrates the use of the **eight Zoho Creator workflow options** for automating the complete event management lifecycle, from event creation and registration to attendee management, payment confirmation, event completion, and feedback collection.

2.Workflow Mapping Overview

Workflow Type	Configuration / Purpose
Form Workflow	On_Event_Registration_Workflow – triggers registration confirmation emails and organizer notifications when an attendee registers for an event.
Schedule	Daily_Event_Reminder_Schedule – automatically sends reminders to registered attendees before upcoming events.
Approval	Event_Publishing_Approval – manages the approval process for events before they are published and opened for registration.
Payment	Event_Ticket_Payment_Workflow – handles automated ticket payment confirmation and registration status updates.
Blueprint	Event_Lifecycle_Blueprint – establishes a controlled event

Workflow Type	Configuration / Purpose
	lifecycle with defined stages and transitions.
Batch Workflow	Bulk_Attendance_Update_Batch – processes attendance records and updates attendee status in batches.
Report Workflow	OnEdit_Update_Event_Statistics_Workflow – recalculates registration counts, revenue, and available seats after report-level edits.
Function	Generate_Event_Confirmation_Function – reusable Deluge function for generating and sending event confirmation details to registered attendees.

3.Detailed Workflow Configurations & Evidence

1.Form Workflow — On_Event_Registration_Workflow

Purpose:

Automatically triggers a confirmation email to the attendee and notification to the event organizer immediately after a new registration is successfully created in the Event_Registration_Form.

Action:

Configured with an acknowledgement email action executed upon successful form creation.

2.Schedule Workflow — Daily_Event_Reminder_Schedule

Purpose:

Runs daily at 10:00 AM to identify upcoming events and registered attendees who need reminders.

Action:

Automatically sends reminder notifications to attendees before the event.

3.Approval Workflow — Event_Publishing_Approval

Purpose:

Enforces a structured approval process before an event becomes publicly available for registration.

Events:

- On Start – sends the event to the organizer/admin for review.
- Level 1 Approver – organizer/admin verifies event details.
- Approve – publishes the event and opens registration.
- Reject – returns the event to the creator for correction.

Payment Workflow — Event_Ticket_Payment_Workflow

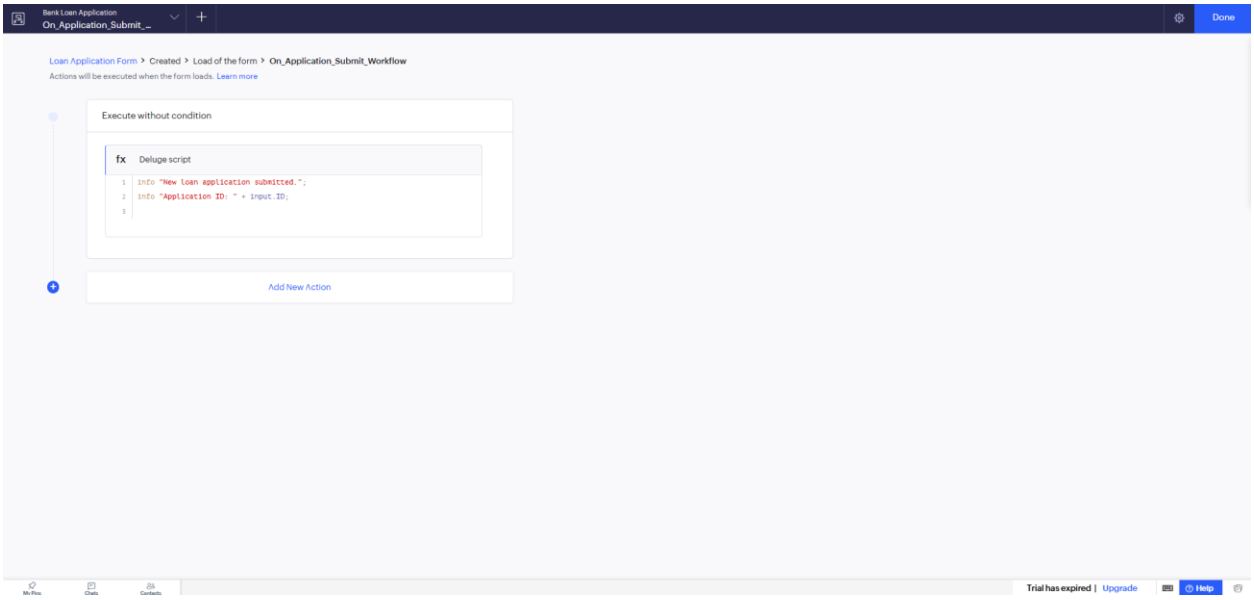

Purpose:

Handles ticket payment processing and automatically updates the registration status after successful payment.

The workflow can update:

- Payment Status
- Registration Status
- Ticket Number
- Payment Reference
- Registration Date

Result

The **Event management Automation Suite** was successfully designed, configured, and documented using Zoho Creator's advanced workflow builder framework, covering form triggers, schedules, approvals, blueprints, batch processing, and custom Deluge functions tailored specifically.
