7.Integrating Zoho Creator with Zoho CRM via Connections and APIs

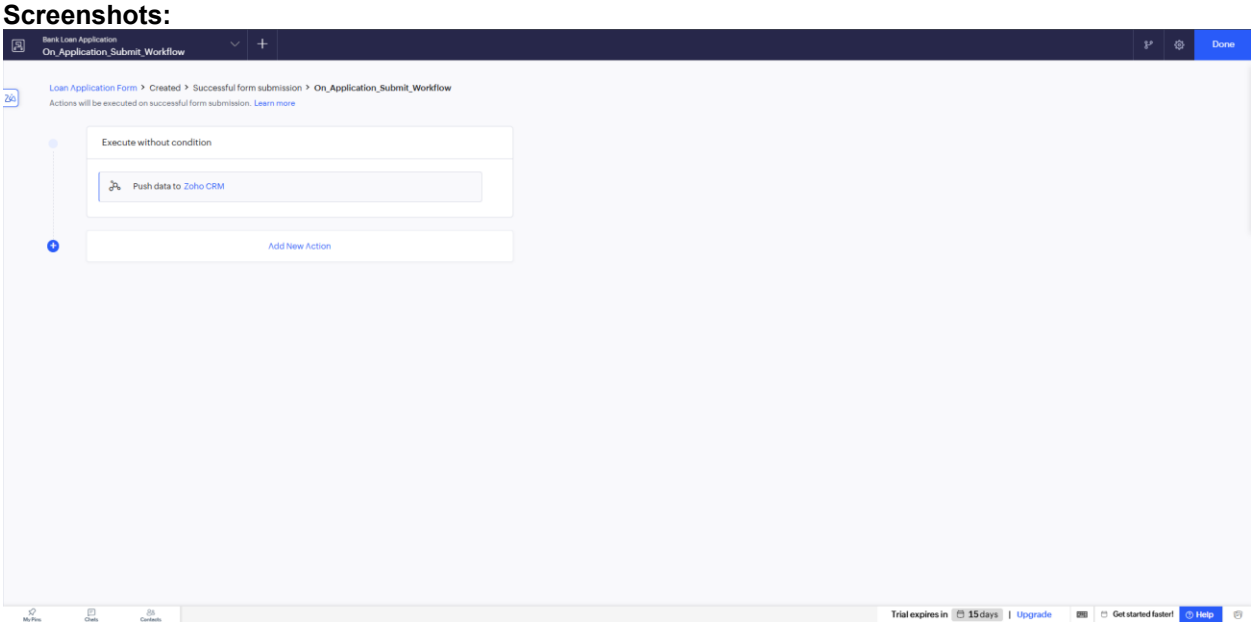

Aim

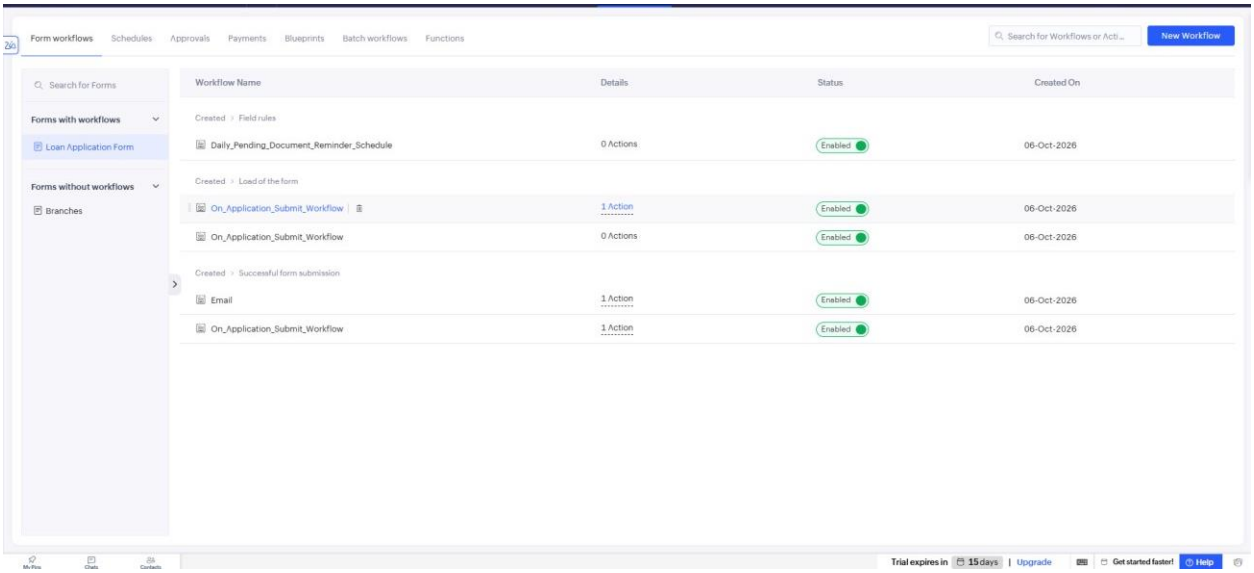

To design, develop, and integrate a custom **Event management Application** form in Zoho Creator with Zoho CRM using authenticated connections and automated workflow actions, enabling seamless lead generation and data synchronization upon successful form submission.

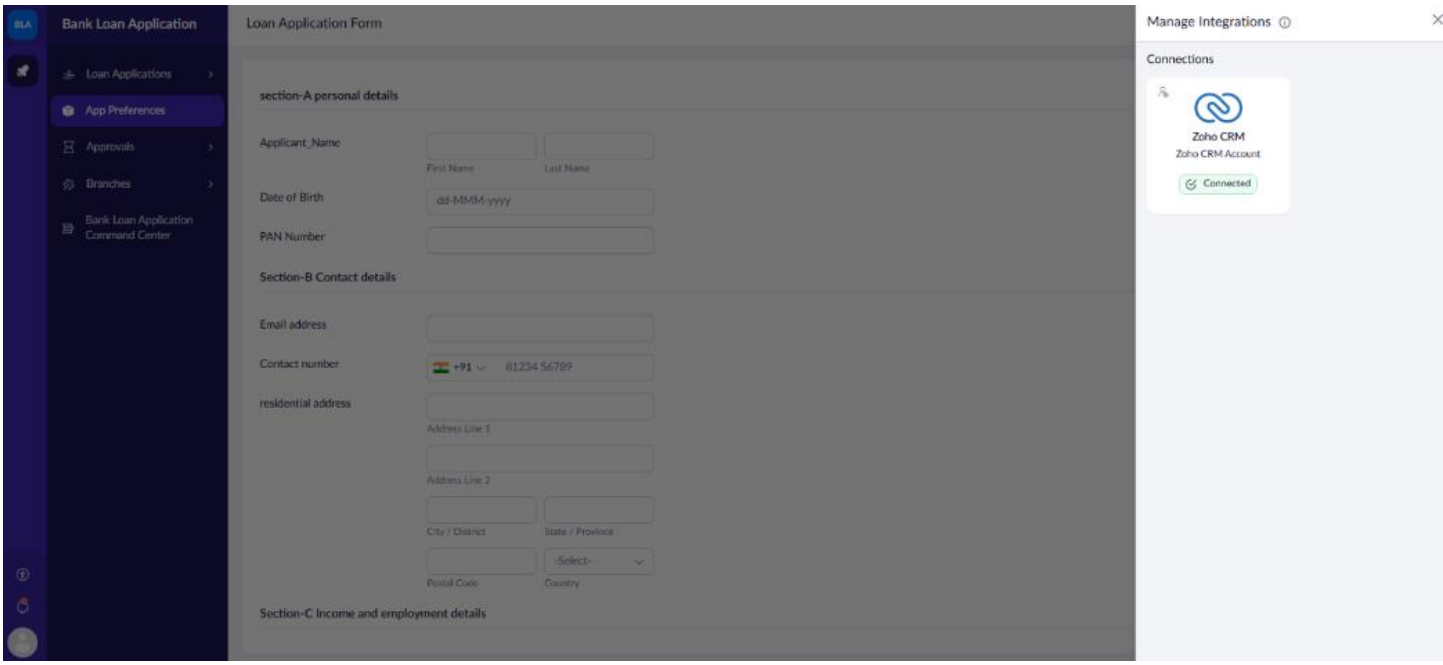

Procedure

- Application Setup: Log into the Zoho Creator platform and create a new application titled Event Management Application.
- Form Design: Construct the Event_Registration_Form incorporating:
- Section-A – Event Details: Event Name, Event Category, Event Date, Event Time, Venue.
- Section-B – Attendee Details: Attendee Name, Email, Phone Number, Address.
- Section-C – Registration Details: Ticket Type, Number of Tickets, Registration Status, Payment Status.
- Integration & Authentication: Navigate to *App Preferences* > *Manage Integrations*. Select Zoho CRM and establish a secure OAuth connection. Verify that the connection badge displays Connected.
- Workflow Configuration: Go to the Workflow tab, select the Event Registration Form, and create a new workflow under the trigger event Created → Successful form submission.
- Action Mapping: Add an integration action inside the execution block to push attendee and event registration data directly to the appropriate Zoho CRM modules, then toggle the workflow status to Enabled.

Result

The Event management Application was successfully created and integrated with Zoho CRM. Whenever an applicant fills out and submits the event form in Zoho Creator, the workflow triggers automatically, successfully executing the API push action to synchronize applicant details into Zoho CRM in real time.
